

The logo for FORA, consisting of the letters 'FORA' in a serif font, centered within a dark blue square. The square is divided into four quadrants by a thin white horizontal and vertical line.

FORA

Overview of proposals for new projects

Anders Hoffmann, Ph.D.
Creative Director, FORA
Centre for Economic and
Business Research

Evaluation of Entrepreneurship Education

- > Methodology - Which methods has been used to evaluate policies/programmes?
- > Results – What has the evaluations shown (effect of policies and programmes to promote entrepreneurship? Effect of classes and activities)
- > Estimated Costs (OECD Estimate):
 - >40.000 Euros in 2007
 - >33.000 Euros in 2008

The Knowledge Filter Research Project

- > FORA could initiate the work by:
 - > Identifying whether policy areas are covered by existing data or not?
 - > Developing framework for surveys for collecting the areas not covered.
 - > Match the analysis design for collecting the areas not covered to the perceptions of carefully selected stakeholders (researchers, incubators, science parks and researchers with previous experience on this topic).

- > We estimate that this will require:
 - > one research analyst working full time for two months and a project leader working full time for one month.
 - > **25.000 Euros.** 17000 for working hours and 8000 for travel expenses, external experts, and stay connected with interviewing stakeholders.

- > What is the next step for the consortium? Should we continue the work? Yes? Maybe?, Or definitely not?

The Risk Capital Policy and Data Project

Purpose:

Provide policymakers and others with a more systematic view on risk capital policy experience and enhance the access to international comparable risk capital data

Five Possible Outcomes:

- > Policy Mapping and Handbook
- > Data Mapping and Handbook
- > International Benchmarking System

Costs:

Min. €20000
